

Creating an Internationally Competitive Economy

This book contains a set of essays by eminent international scholars from Australia, New Zealand, the U.K. and the U.S. It addresses the issues of globalisation and international competitiveness and includes discussions of market power, competition policy and the effects of foreign trade, globalisation and the labour market. The contributors also examine economic integration and regional policy cooperation, trade and communications, economic growth, including export led growth and foreign direct investment in developing countries, and the diffusion of technology.
