

## Dear Frank...

Dear Frank Frank Thomas is the worlds leading expert on golf equipment. As a design engineer at Shakespeare Sporting Goods in the 1960s and 70s, he invented the graphite shaft, a piece of technology found in the bag of nearly every golfer today. As Technical Director of the United States Golf Association, he issued thousands upon thousands of rulings on equipment, literally writing the rules that govern the implements of the game. Following on the success of Just Hit It, Thomass new book Dear Frank is an enjoyable, informative collection of 100 question and answers about golf equipment, compiled from Thomass popular on-line column, which receives tens of thousands of visits from regular golfers every week. Do regular golfers really play with the same clubs as the pros? Do knockoffs work as well as the more expensive brand names? Whats the truth about titanium and distance? Can a driver lose its pop over time? Are blades or cavity-backed irons longer? Does cold weather affect golf clubs? Does plumb-bobbing really work? Are expensive and custom-tweaked shafts worth the money? Can you clean golf balls in the dishwasher? The answers to these and more are here, in clear and concise language that takes complex technical subjects and makes them understandable to everyone. Dear Frank delivers honest evaluations in an informal, friendly, practical manner, cutting through the hype of golf equipment marketing. Thomas educates and entertains, delivering his customary sterling advice to golfers in need. He knows what works and what doesnt, whats worth buying and whats not worth worrying about. He also knows how you can get the technology you need at a price youre willing to pay advice that will save the reader far more than the cost of the book itself. The technical expertise and personal communication in Dear Frank

Dear Frank...

provide a practical source of information that will help all golfers select the right equipment and lower their handicaps while saving them some scratch.
