

Essays in Economics, Vol. 4: National and International

This fourth volume in the series of Nobel laureate James Tobin's classic papers represents his work since 1980. Both national and international views are intermingled among the 36 chapters on macroeconomics and fiscal policy, savings, stabilization policy, international coordination of macroeconomic policy, monetary policy, and exchange rates. Several tributes to colleagues -- including Walter Heller and Seymour Harris -- round out the collection.
