

# Everest

Since the first successful ascent of Everest 50 years ago, many others have attempted the daunting summit, and many have succeeded. But, though Everest can be climbed, it cannot be conquered. Few know this as well as David Breashears. A filmmaker and veteran climber of the Himalaya, Breashears agreed to lead the May 1996 expedition that would capture Everest in a large-format IMAX(c) motion picture. Even in the best conditions, Breashears knew, Everest is a dangerous challenge--that May, an unexpected blizzard proved how deadly it could be. Shocking the world, the storm claimed the lives of eight climbers, including two of the world's top expedition leaders. Everest is the breathtaking chronicle of a filmmaking expedition turned rescue mission, and of the courage and cooperation of Breashears and his team as they rose to the life or death challenge. A companion to Breashears's record-grossing large-format film, Everest features an introduction by Outside magazine editor-at-large Tim Cahill, an afterword by David Breashears, and 125 stunning, full-color images, including IMAX frames from the film.
