* Since I never heard of salsify and this cookbook does go back to the early 20th century, I thought I would include the definition for your information: 1. root eaten as vegetable: a long earth-colored edible root of a plant of the daisy family, which is said to have a taste resembling oysters, cooked as a vegetable. 2. European plant with edible root: a plant of the daisy family with long thin leaves and roots that are salsify. Native to: Europe.
