

How to make money online in Kenya

Learn how to make money online even if you are living in Kenya. With the internet, making money online can be a profitable business. When it comes to internet businesses, not many Kenyans are into it and even among those who are already doing it, only few make good money from it. Some see online income as something that is only worth doing on part time for supplementary income. Well, the truth is that if you treat it as supplementary income, that's what it many continue to be for you but when you start treating it as a full time business, that's when it can start bringing in good money for you. It's a give and take business because your online success depends on how much effort you put into it. I normally tell people that if they work on their online business as hard as they do on their full time job, it could replace their need for that job.
