

An Accounting Model-Based Approach to Semantic Reconciliation in Heterogeneous Database Systems (Classic Reprint)

Excerpt from An Accounting Model-Based Approach to Semantic Reconciliation in Heterogeneous Database Systems Acknowledgements Work reported herein has been supported, in part, by MIT's International Financial Service Research Center and MIT's Center for Information Systems Research. The author wishes to thank Allen Moulton for his insight during the early stage of this research and Sung Khang for his field work. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
